

GODING IS SCARY

Not as scary as you think. With Neocities you are given a blank slate of HTML and CSS to code. However through resources like W3 Schools and other webmasters on Neocities providing assets for you to use, in a few hours you'll have a robust webpage!

things I've found on Neocities

- A Massive Queer community
- Fansites dedicated to literally anything!
- Really, really cool artists
- ZINES!
- Super friendly people that help you when your brain hurts from coding at 3 am.

but wait.
there's more!

Games!
Webcomics!
RPGS!
ARGS!

These aren't the kind of sites you find through google, one site tends to lead you to another sending you through a journey of old web themed pages, so go make your mark!

Made with the limitations
of old web text generators
